PROFESSIONAL EXPERIENCE

Inventech Info Solutions Pvt Ltd | Salesforce Associate | January 2023 – March 2024

- Demonstrated strong proficiency in Apex development, creating well-structured Apex Classes, Triggers, Handlers, and Test Classes following best practices and coding standards.
- Successfully worked with Salesforce data model, utilizing SOQL, SOSL, DML statements, and comprehensive understanding of Objects and Governor Limits.
- Proficient in the basics of integrating Salesforce with external systems and applications to streamline data exchange and business processes.
- Gained primary-level experience in Web Services, providing solutions through SOAP and REST Integrations, contributing to data Integrity and system connectivity.
- Gained experience in authentication methods, like OAuth, to secure Salesforce API integrations.
- Acquired exposure to advanced Salesforce technologies, including Lightning Web Components, Asynchronous programming, and Custom Settings & Custom Metadata.
- Hands-on proficiency in designing, developing, and deploying LWC on the Salesforce platform, Experienced in creating responsive and interactive user interfaces for web applications.
- Experienced in implementing two-way data binding to efficiently manage data within LWC components. Skilled in event-driven programming within Lightning Components, enabling seamless communication between components for enhanced functionality.
- Played a key role in implementing various declarative features such as Flows, Approval Processes, Cross-Object Formula Fields, Workflow rules, Validation Rules, Reports, Dashboards, Email Services, Page Layouts, Record Types, Workflow Alerts, and Relationships, aligning with the specific requirements of the applications.

- Assumed responsibility for Salesforce Security, skillfully configuring and implementing Security and Sharing Rules at the Object, Field, and Record levels, catering to different user needs throughout the organization. This involved the creation of various Profiles and the configuration of Permissions based on the organizational hierarchy.
- Proficiently utilized Data Loader and Data Import Wizard for effective Data Management, ensuring data integrity and accuracy.
- Demonstrated expertise in the end-to-end software development lifecycle, encompassing Analysis, Design, Development, and Testing of the Salesforce Application to align with the specific business requirements.
